1942

AIEE INDEXES

This pamphlet contains complete multientry indexes covering the entire text content of AIEE regular technical publications, as follows:

1. **Electrical Engineering,** monthly, sent to all members. Contains two parts:
   I. General articles, news, and biographical items.
   II. Transactions section, containing technical-program papers presented at national and District technical meetings.

2. **Supplement to Electrical Engineering—Transactions Section.** Issued in limited quantities at mid-year (June Supplement) and year-end (December Supplement). Contains the technical program papers that could not be accommodated in the monthly Transactions sections of *Electrical Engineering*, plus discussions of all technical-program papers published during the preceding half year. Price 50 cents per copy.

3. **AIEE Transactions.** Published annually. Contains all approved technical-program papers and related discussions for the calendar year. Consists of Transactions sections from the monthly issues of *Electrical Engineering*; the two semiannual Supplements (as described in item 2 above); and certain other material considered to be of permanent record value. Price $4.00 per copy to AIEE members; $12.00 plus foreign postage to nonmembers.

I. GENERAL MATERIAL (Pages 3–10)

General articles, news, and biographical items published in the general monthly periodical are indexed as follows:

1. **Subject Index.** Lists all general-interest articles by subjects.

2. **Author Index.** Lists authors of all general-interest articles and "Letters to the Editor."

3. **AIEE News Index.** Lists all news items pertaining to Institute Activities.

4. **Non-AIEE News Index.** Lists all news items "Of Current Interest" not pertaining directly to Institute activities.

5. **Biographical Index.** Lists all personal and obituary items on AIEE members.

Page Allocation by Issues

January	1–64	July	339–390
February	65–110	August	391–446
March	111–176	September	447–498
April	177–228	October	499–544
May	229–278	November	545–588
June	279–338	December	589–638

II. TRANSACTIONS MATERIAL (Pages 11–22)

Technical-program papers and related discussions are indexed as follows:

1. **Technical-Subject Index.** Lists all technical-program papers and related discussions by subjects.

2. **Author Index.** Lists authors of all technical-program papers and discussions.

Of the total content of the 1942 annual *Transactions*, pages 1–348 and 483–892 inclusive were published in the Transactions sections of *Electrical Engineering* during 1942 as tabulated below; pages 349–482 were published in the June "Supplement to Electrical Engineering—Transactions Section" and pages 893–1076 in the December Supplement.

Page Allocation by Issues

January	1–48	July	483–538
February	49–104	August	539–622
March	105–168	September	623–706
April	169–232	October	707–770
May	233–296	November	771–834
June	297–348	December	835–892
June Supplement	349–482	December Supplement	893–1076

I—GENERAL MATERIAL

(See page 11 for Transactions Material Index)

1. Subject Index

Air Raid Alarm Device. (Letter) Vickerson, Gray. 496
Air Raids on British Power Systems, Effect of. Harrap. 231–41
Airport, Electrification of the Chicago. Baumer .. 341–8
Airport Lighting. Pearson 119–25
Alarm Device, Air Raid. (Letter) Vickerson, Gray. 496
Alternating Current in the United States Navy. Rickover 289–302
America, Switchgear Practice in Europe and. MacNeill 609–13
American Economics, The Potential of Inter-. McQueen 25–30
American, I Am an. Boyajian 614–15
American Industry, Protective Lighting for. Tuck .. 80–3
Analysis of Circuits With Linear Lumped Paramciers, Laplacian Transform. Millman 197–205
Letter 446
Analysis of Systems With Known Transmission-Frequency Characteristics by Fourier Integrals. Sullivan 248–56
Analytic Approach to the Hysteresis Loop, An. (Letter) Weygandt, Charp 387
Apparatus, Dual Rating of Electrical. (Letters)
Compton 61
Hellmund 62
Blackledge 227
Arnold, Bion J. (Letter) Roper 337
Aspects of the Electromagnetic Field, Some. Page. 511–16
Automatic Control for Washing Machines. Russell. 89–92

B

Backward Look for a Forward Plan, A. Hockema. 406–14
(Basic Science) Some Aspects of the Electromagnetic Field. Page 511–16
Bion J. Arnold. (Letter) Roper 337
Books for Engineers. (Letter) Plowman 277
Brazil, Railroad Electrification in. (Filler) 241
British Power Systems, Effect of Air Raids on. Harrap. 231–41

C

Cable Versus Gas-Filled Cable, Compression and Oil-Filled. (Letter) Hochstadter 586
Calculating Line-Drop Compensator Settings, A Simplified Method of. (Letter) Keck, Kozak 336
Calculation of Fault Currents, Simplified. (Committee Report) 509–11
Calculation, Voltage. (Letters)
Smith 63
Hoadley 109
Blade 225
Chamberlin 225
Calculus, Heaviside's Direct Operational. Russell .. 84–8
Car Lighting, Modern Railroad. Hamilton 179–86
Carrier-Current Relaying and Communication on the TVA System. Merritt, Talmage 561–72
Characteristics of Driven Grounds. (Letters)
Treadway 106
Taylor 584
Chicago Airport, Electrification of the. Baumer .. 341–8
Chokes, Use of Loud-Speaker Fields as Filter. (Letter) Pullen 389
Circuit for Studying Hunting, An Electronic. DeLerno, Bassett 603–06
Circuits for the Hunting of Electrical Machinery, Equivalent. (Letter) Alger 277
Circuits With Linear Lumped Parameters, Laplacian Transform Analysis of. Millman 197–205
Letter 445
(Committee Report) Protective Devices.
Part III—Ten Years of Progress in Lightning Protection 187–92
(Committee Report) Simplified Calculation of Fault Currents 509–11
(Committee Report) Stability of Impregnated-Paper Insulation. Whitehead 554–5
Communication on the TVA System, Carrier-Current Relaying and. Merritt, Talmage 561–72
Compensator Settings, A Simplified Method of Calculating Line-Drop. (Letter) Keck, Kozak .. 336
Complex Numbers, Graphical Aid in Multiplying and Dividing. (Letter) Jackson 104
Complex Plane, Integration in the. Friedrichs .. 139–43
Concepts at Extremely High Frequencies, Electrical. Ramo 461–4
Conductors, Electrical Heating of Overhead. (Letter) Nachod 637
Conductors, Wind Shielding of Parallel. Sheckels. 354–7
Contribution to the War Effort, The Engineer's. Symonds 132–4
Control and the War, Quality. Simon 449–52
Control for Washing Machines, Automatic. Russell. 89–92
Corrections for Temperature Tests on Short Samples, Terminal. (Letter) Bauer, Taylor 584
Current Relaying and Communication on the TVA System, Carrier-. Merritt, Talmage 561–72
Currents, Simplified Calculation of Fault. (Committee Report) 509–11
Currents, The Effect of Initial Conditions on Subharmonic. (Letter) Spitzer, Evans 635
Cyclotron, The. Brobeck 348–53

D

Debt I Owe, A. Whitehead 136–8
(Defense) Potential of Inter-American Economics, The. McQueen 25–30
Defense, Power for.
Part I—National Policy. Olds 3–8
Part II—National Program. Tate 8–17
Part III—The Utility View. Parker 18–21
Part IV—The Manufacturer's View. Kelly 22–4
Democracy in Its Struggle Looks to the Engineer. Ewing 402–05
Detecting the Saboteur Static Electricity in Gasoline Fires. Beach 501–08
Letter 636
Determinants, Evaluating. (Letter) Huggins 497
Dielectric Nomenclature. (Letter) Race 105
Dividing Complex Numbers, Graphical Aid in Multiplying and. (Letter) Jackson 104
Driven Grounds, Characteristics of. (Letters)
Treadway 106
Taylor 584
Dual Rating of Electrical Apparatus. (Letters)
Compton 61
Hellmund 62
Blackledge 227

E

Economics, The Potential of Inter-American. McQueen 25–30
Edison Medallist for 1941, John B. Whitehead .. 135–8
Education and the War, Vocational. Grace 520–3
Effect of Air Raids on British Power Systems. Harrap. 231–41
Effect of War on Young Engineers Inducted Into Industry, The. Boring 281–5
Letter 585
Effects of Ice and Wind on 13,000-Volt Transmission Line. (Letter) Glassco 174
Efficiency, Wartime National. Gaherty 547–50
Electric Service by High-Speed Switching, Improving. (Letters)
Bailey 62
Goldsborough 63
Electric Shock Induced by Lightning Stroke. (Letter) Starr 227
Electric Stress in Impregnated-Paper Insulation, Temperature and. (Letter) Garton 636
Electric-System Planning, Wartime. Hooke, Plant. 192–6
Electrical Apparatus, Dual Rating of. (Letters)
Compton 61
Hellmund 62
Blackledge 227
Electrical Concepts at Extremely High Frequencies. Ramo 461–4
Electrical Engineering Format, New. (Letters)
Hess 174
Morton 174
Orlovic 174
Faisant 174
Electrical Engineering, Wartime. Muir 283–5
Electrical Features of the 200-Inch Telescope. Kule. 67–70
Electrical Machinery, Equivalent Circuits for the Hunting of. (Letter) Alger 277
Electrical Porcelain Developed, Hybrid. (Filler) .. 79
Electrical Research, Wartime. Hawkins 285–8
Electrical Resonance, History of. (Filler) 353
Electrical Science, Joseph Henry—Pioneer in. Osborne. 550–3
(Electricity) Alternating Current in the United States Navy. Rickover 289–302
Electricity in Gasoline Fires, Detecting the Saboteur Static. Beach 501–08
Letter 636
Electrification of the Chicago Airport. Baumer .. 341–8
(Electroagricultural) New Engineering and a New Industry. Samuels 517–20
Electromagnetic Field, Some Aspects of the. Page. 511–16
Electronic Circuit for Studying Hunting, A. DeLerno, Bassett 603–06
(Electronics) Electrical Concepts at Extremely High Frequencies. Ramo 461–4
Energy, Progress in the Art of Metering Electric. (Letters) Schattner 63, 389
Engineer and the Engineering Method, The. Gruehr. 465–8
Engineer, Democracy in Its Struggle Looks to the. Ewing 402–05
Engineering and a New Industry, New. Samuels. 517–20
Engineering Method, The Engineer and the. Gruehr. 465–8
Engineering, Wartime Electrical. Muir 283–5
Engineer's Contribution to the War Effort, The. Symonds 132–4
Engineers Inducted Into Industry, The Effect of War on Young. Boring 281–5
Letter 585
Engineer's Last in the Postwar World, The. Prince. 393–6
Equations from Laboratory Data, Vector. (Letter) Hertzler 107
Equations, Transmission-Line. (Letter) Casna .. 587
Equivalent Circuits for the Hunting of Electrical Machinery. (Letter) Alger 277
Europe and America, Switchgear Practice in. MacNeill 609–13
Evaluating Determinants. (Letter) Huggins 497

F

Fault Currents, Simplified Calculation of. (Committee Report) 509–11
Field, Some Aspects of the Electromagngtic. Page. 511–16
Fighting For, A Peace Worth. Wickenden 113–19
Letters 386, 542, 586
Fillers (See Miscellaneous Short Items)
Filter Chokes, Use of Loud-Speaker Fields As. (Letter) Pullen 389
Fires, Detecting the Saboteur Static Electricity in Gasoline. Beach 501–08
Letter 636
Forward Plan, A Backward Look for a. Hockema. 406–14
Fourier Integrals, Analysis of Systems With Known Transmission-Frequency Characteristics by. Sullivan 248–56
Frequencies, Electrical Concepts at Extremely High. Ramo 461–4
Frequency Transmission in Wave Guides, Ultrahigh-Ware 598–603
Furnaces, Rotary-Hearth Electric. (Photo) 553

G

Gas-Filled Cable, Compression and Oil-Filled Cable Versus. (Letter) Hochstadter 586
Gasoline Fires, Detecting the Saboteur Static Electricity in. Beach 501–08
Letter 636
Generator Insulation, Field Testing of. (Letter) Plumb 389
Graphical Aid in Multiplying and Dividing Complex Numbers. (Letter) Jackson 104
Grounds, Characteristics of Driven. (Letters)
Treadway 106
Taylor 584
Guides, Ultrahigh-Frequency Transmission in Wave. Ware 598–603

H

Hazardous Structures, Lightning Protection of. McCann 591–7
Heating by Reversed Refrigeration. Heitchue .. 556–60
Heating of Overhead Conductors, Electrical. (Letter) Nachod 637
Heaviside's Direct Operational Calculus. Russell .. 84–8

Henry—Pioneer in Electrical Science, Joseph. Osborne....550–3
High Frequencies, Electrical Concepts at Extremely. Ramo....461–4
High School Trains for Life, The Technical. Crofoot....452–7
Hunting, An Electronic Circuit for Studying. DeLetter, Bassett....603–06
Hybrid Electrical Porcelain Developed. (Filler)....79
Hydroelectric Potentialities, Brazil's. (Filler)....414
Hysteresis Loop, An Analytic Approach to the. (Letter) Weygandt, Charp....387

I

I Am an American. Boyajian....614–15
Ice and Wind on 13,000-Volt Transmission Line, Effects of. (Letter) Glasco....174
Illumination Aids War Production, Good. (Photo)....34

Policy, National. Olds....3–8
Porcelain Developed, Hybrid Electrical. (Filler)....79
Postwar Planning. (Letter) Harrap....274
Postwar World, The Engineer's Last in the. Prince....593–6
Potential of Inter-American Economics, The. McQueen....25–30
Powder Metallurgy. Kelley....468–75
Powdered-Iron Cores, Radio Uses of. (Filler)....196
Power, A Suggestion for Saving. (Letter) Mackler....543
Power for Defense.
Part I—National Policy. Olds....3–8
Part II—National Program. Tate....8–17
Part III—The Utility View. Parker....18–21
Part IV—The Manufacturer's View. Kelly....22–4
Power Systems, Effect of Air Raids on British. Harrap....231–41

Practice in Europe and America, Switchgear. MacNeill. 609–13
Progress in Lightning Protection, Ten Years of. (Committee Report) 187–92
Progress in Relaying. (Letter) MacGahan 106
Progress in the Art of Metering Electric Energy. (Letters) Schattner 63, 389
Protection of Hazardous Structures, Lightning. McCann. 591–7
Protection, Ten Years of Progress in Lightning. (Committee Report) 187–92
Protective Lighting for American Industry. Tuck .. 80–3

Q

Quality Control and the War. Simon 449–52

R

Radio Uses of Powdered-Iron Cores. (Filler) 196
Railroad-Car Lighting, Modern. Hamilton 179–86
Railroad Electrification in Brazil. (Filler) 241
Rating of Electrical Apparatus, Dual. (Letters)
Compton 61
Hellmund 62
Blackledge 227
Refrigeration, Heating by Reversed. Heitchue .. 556–60
Relaying and Communication on the TVA System, Carrier-Current. Merritt, Talmage 561–72
Relaying, Progress in. (Letter) MacGahan 106
(Research) The Cyclotron. Brobeck 348–53
Research, Wartime Electrical. Hawkins 285–8
Resonance, History of Electrical. (Filler) 353
Reversed Refrigeration, Heating by. Heitchue .. 556–60
Rheostat Loads, Balancing Three-Phase Water-. (Letter) Wouk 542
Ricketts—1941 Lamme Medalist, Forrest E. Stahl. 396–400
(Rural Electrification) New Engineering and a New Industry. Samuels 517–20

S

Saboteur Static Electricity in Gasoline Fires, Detecting the. Beach 501–08
Letter 636
Saving Power, A Suggestion for. (Letter) Mackler. 543
School Trains for Life, The Technical High. Crofoot. 452–7
Science, Joseph Henry—Pioneer in Electrical. Osborne. 550–3
Second Mile, The. Wickenden 242–7
Service by High-Speed Switching, Improving Electric. (Letters)
Bailey 62
Goldsborough 63
Shielding of Parallel Conductors, Wind. Sheckels. 354–7
Shock Induced by Lightning Stroke, Electric. (Letter) Starr 227
Short Samples, Terminal Corrections for Temperature Tests on. (Letter) Bauer, Taylor 584
Simplified Calculation of Fault Currents. (Committee Report) 509–11
Simplified Method of Calculating Line-Drop Compensator Settings, A. (Letter) Keck, Kozak 336
Some Aspects of the Electromagnetic Field. Page. 511–16
Speaker Fields as Filter Chokes, Use of Loud-. (Letter) Pullen 389
Stability of Impregnated-Paper Insulation. Whitehead. 554–5
Stability of Transformer Circuits, Criteria for Neutral. (Letter) Taylor 497
Static Electricity in Gasoline Fires, Detecting the Saboteur. Beach 501–08
Letter 636
Stress in Impregnated-Paper Insulation, Temperature and Electric. (Letter) Garton 636
Structures, Lightning Protection of Hazardous. McCann. 591–7
Subharmonic Currents, The Effect of Initial Conditions on. (Letter) Spitzer, Evans 635
Substitute Materials in War-Plant Lighting. Tillson. 458–60
Switchgear Practice in Europe and America. MacNeill. 609–13
Switching, Improving Electric Service by High-Speed. (Letters)
Bailey 62
Goldsborough 63
System Planning, Wartime Electric-. Hooke, Plant. 192–6
Systems, Effect of Air Raids on British Power. Harrap. 231–41
Systems With Known Transmission-Frequency Characteristics by Fourier Integrals, Analysis of. Sullivan 248–56

T

Technical High School Trains for Life, The. Crofoot. 452–7
Technical Paper, Writing a. (Letter) Ketcham .. 494
Telescope, Electrical Features of the 200-Inch. Rule. 67–78
Telescopes, The World's Largest. (Filler) 78
Temperature and Electric Stress in Impregnated-Paper Insulation. (Letter) Garton 636
Temperature Tests on Short Samples, Terminal Corrections for. (Letter) Bauer, Taylor 584
Temperatures, Measuring Transformer-Winding. (Letter) Taylor 173
TVA System, Carrier-Current Relaying and Communication on the. Merritt, Talmage 561–72
Testing of Generator Insulation, Field. (Letter) Plumb 389
Theorem, A Matrix. (Letter) Pipes 175
Theorems, Two Network. (Letters)
Ling 225
Millman 542
Three-Phase Water-Rheostat Loads, Balancing. (Letter) Wouk 542
Tin, Induction Heating Saves. (Filler) 613
Trains for Life, The Technical High School. Crofoot. 452–7
Transform Analysis of Circuits With Linear Lumped Parameters, Laplacian. Millman 197–205
Letter 445
Transformer Circuits, Criteria for Neutral Stability of. (Letter) Taylor 497
Transformer-Winding Temperatures, Measuring. (Letter) Taylor 173
Transmission-Frequency Characteristics by Fourier Integrals, Analysis of Systems With Known. Sullivan 248–56
Transmission in Wave Guides, Ultrahigh-Frequency. Ware 589–603
Transmission Line, Effects of Ice and Wind on 13,000-Volt. (Letter) Glasco 174
Transmission-Line Equations. (Letter) Cisna .. 587
Transmission Lines, Traveling Waves on. Weber .. 302–09
Traveling Waves on Transmission Lines. Weber .. 302–09
Tunnel, Photoelectric System Controls Traffic in Continental Divide. (Filler) 457

U

Ultrahigh-Frequency Transmission in Wave Guides. Ware 598–603

II—TRANSACTIONS MATERIAL

(See page 2 for explanation)

1. Technical-Subject Index

A 2,500,000-Kva Compressed-Air Powerhouse Breaker. Ludwig, Wilcox, Baker....235–41; disc. 414

Abnormal Currents in Distribution Transformers Due to Lightning. Bryant, Newman....564–8; disc. 1003

Acceleration-Oscillogram Method of Motor-Torque Measurement. Atkinson, Downie..7–9; disc. 473

Acoustics and the Quiet Train Ride. Jack....382–92; disc. 417

Adjustable-Speed Wind-Tunnel Drive, Large. Clymer....156–8; disc. 456

Admittance-Vector Locus, Current-Transformer Performance Based on. Schwager....26–30; disc. 465

Air-Blast Circuit Breaker, Field Tests and Performance of a High-Speed 138-Kv. Sporn, Strang....1–6; disc. 412

Air-Blast Circuit-Breaker Installations in Canada, Some. Haberl, Moore....859–63; disc. 1073

Air-Blast Circuit Breakers, Design and Operation of High-Voltage Axial. Leuthold..869–75; disc. 1073

Air-Blast Station-Type Circuit Breakers, Field Tests on High-Capacity. Strang, Skeats..100–04; disc. 409

Air Circuit Breaker for Mercury-Arc-Rectifier Anode Circuits and Its Relation to the Arc-Back Problem, A New Multiple High-Speed. Seaman, Morton..788–96; disc. 1057

Air-Cooled Oil-Immersed Power Transformers by Hot-Spot Temperatures, Emergency Overloading of. Montsinger, Ketchum....906–16; disc. 993

Air Corps Wind Tunnel at Wright Field, Dayton, Ohio, Variable-Speed Drive for United States Army. Dickey, Laffoon, Kilgore....126–30; disc. 456

Air Operating Mechanism for Oil Circuit Breakers, A Compressed-. Cunningham, Hill....695–8; disc. 1019

Air Powerhouse Breaker, A 2,500,000-Kva Compressed-. Ludwig, Wilcox, Baker....235–41; disc. 414

(Air Transportation) A Study of the Modified Kramer or Asynchronous-Synchronous Cascade Variable-Speed Drive. Liwschitz, Kilgore....255–60

(Air Transportation) Large Adjustable-Speed Wind-Tunnel Drive. Clymer....156–8; disc. 456

(Air Transportation) Magnetic-Drag Tachometer, The. Ballard....366–9

Aircraft, A D-C Telemeter or D-C Selsyn for. Jewell, Paus....314–17

Aircraft Generators, The Application of Voltage Regulators to. Thompson, Crever....363–5

Aircraft Voltage Regulator and Cutout. Jones, Exner, Wright....334–9

A-C Electric Locomotives on the Pennsylvania Railroad—Protection and Tonnage Rating, Single-Phase. Griffith....224–8

A-C Motor, Theory of the Brush-Shifting. Conrad, Zweig, Clarke.
Part III....502–06
Part IV....507–13

A-C Network Analysis Using Resistance Networks, Method for. Enns....875–80; disc. 1069

A-C Power-Transmission Systems, Stability Study of. Holm....893–905; disc. 1046

A-C Systems, Standardized Load-Center Unit Substations for Low-Voltage. Hunter, Page....519–25

A-C Wave Form, Its Determination and Standardization, History of. Bedell....864–8; disc. 1071

Altitudes in Colorado, Lightning Investigation at High. Robertson, Lewis, Foust....201–08; disc. 453

Ambient-Temperature Conditions, Application of Apparatus and Conductors Under Various. Hellmund, McAuley....553–8; disc. 992

American Gas and Electric Company, Lightning Investigation on 132-Kv Transmission System of the. Gross, Lippert....178–85; disc. 450, 974

Amplidyne Generator, Steady-State Theory of the. Graybeal....750–6; disc. 1049

Analysis of Circuit-Breaker Performance When Switching Large Capacitor Banks, Tests and. Schroeder, Boehne, Butler....821–31; disc. 1020

Analysis of Short Circuits for Distribution Systems. Dalziel....757–64; disc. 1048

Analysis of the Application of High-Speed Reclosing Breakers to Transmission Systems. Crary, Kennedy, Woodrow....339–48; disc. 423

Analysis, Rectifier Terminology and Circuit. Willis, Hershind....496–9; disc. 974

Analysis Using Resistance Networks, Method for A-C Network. Enns....875–80; disc. 1069

Analytical Treatment for Establishing Load-Cycle Ratings of Ignitrons. Marshall, Arnott....545–8; disc. 1051

Analyzer, A Turbine-Governor Performance. Osbon. (1941 Transactions, November section, pages 963–7)....Disc. 393

Anode Circuits and Its Relation to the Arc-Back Problem, A New Multiple High-Speed Air Circuit Breaker for Mercury-Arc Rectifier. Seaman, Morton....788–96; disc. 1057

Apparatus and Conductors Under Various Ambient-Temperature Conditions, Application of. Hellmund, McAuley....553–8; disc. 992

Application of Apparatus and Conductors Under Various Ambient-Temperature Conditions. Hellmund, McAuley....553–8; disc. 992

Application of High-Speed Reclosing Breakers to Transmission Systems, Analysis of the. Crary, Kennedy, Woodrow....339–48; disc. 423

Application of Vacuum-Tube Oscillators to Inductive and Dielectric Heating in Industry. Jordan..831–4

Application of Voltage Regulators to Aircraft Generators, The. Thompson, Crever....363–5

Arc—a Valuable Industrial Tool, The Carbon. Kalb....581–5

Arc-Back Problem, A New Multiple High-Speed Air Circuit Breaker for Mercury-Arc-Rectifier Anode Circuits and Its Relation to the. Seaman, Morton....788–96; disc. 1057

Army Air Corps Wind Tunnel at Wright Field, Dayton, Ohio, Variable-Speed Drive for United States. Dickey, Laffoon, Kilgore....126–30; disc. 456

Arrester Performance Characteristics, Distribution-Type Lightning. (Committee Report)....132

Arresters, Field Investigation of the Characteristics of Lightning Currents Discharged by. Gross, McCann, Beck....266–71; disc. 461

Arresters, Modern Cathode-Ray Oscillograph for Testing Lightning. Wade, Carpenter, MacCarthy (Committee Report)....549–53; disc. 982

Arresters, Modern Impulse Generators for Testing Lightning. Brownlee....539–44; disc. 984

Asynchronous-Synchronous Cascade Variable-Speed Drive, A Study of the Modified Kramer or. Liwschitz, Kilgore....255–60

Automatic Stations, 1930–1941, Bibliography on (Committee Report)....1111–32

(Automatic Stations) Multichannel Carrier-Current Facilities for a Power Line. Sandstrom, Foster....71–6; disc. 469

Axial Air-Blast Circuit Breakers, Design and Operation of High-Voltage. Leuthold....869–75; disc. 1073

Axis, Saturated Synchronous Machines Under Transient Conditions in the Pole. Rüdenberg....297–306; disc. 444

B

Banks, High-Voltage Fusing of Transformer. Marsh, Dodds....533–5; disc. 977

Banks, Tests and Analysis of Circuit-Breaker Performance When Switching Large Capacitor. Schroeder, Boehne, Butler....821–31; disc. 1020

(Basic Sciences) Energy Flow in Electric Systems—the *Vi* Energy-Flow Postulate. Slepian....835–41; disc. 1054

(Basic Sciences) Formulas for Calculating Short-Circuit Stresses for Bus Supports for Rectangular Tubular Conductors. Higgins....578–80

(Basic Sciences) Formulas for the Magnetic-Field Strength Near a Cylindrical Coil. Dwight....327–33; disc. 445

(Basic Sciences) High-Frequency Coaxial-Line Calculations. Race, Larrick....526–30

(Basic Sciences) History of A-C Wave Form, Its Determination and Standardization. Bedell....864–8; disc. 1071

(Basic Sciences) Inverse Functions of Complex Quantities. Dwight....850–3

(Basic Sciences) On Eddy Currents in a Rotating Disk. Smythe....681–4

(Basic Sciences) Reactance and Skin Effect of Concentric Tubular Conductors. Dwight....513–18; disc. 976

(Basic Sciences) Saturated Synchronous Machines Under Transient Conditions in the Pole Axis. Rüdenberg....297–306; disc. 444

(Basic Sciences) The Effect of Initial Conditions on Subharmonic Currents in a Nonlinear Series Circuit. Angello....526–7

(Basic Sciences) The Electrical Strength of Nitrogen and Freon Under Pressure. Skilling, Brenner....191–5; disc. 441

Behavior of Directional Relays, Factors Which Influence the. Graybeal....942–52

Bibliography on Automatic Stations, 1931–1941 (Committee Report)....1111–32

Bibliography on Circuit-Interrupting Devices, 1928–1940. (Committee Report)....1077–1100

Bibliography on Electrical Safety—1930–1941..(Committee Report)....1101–10

Bimetal Type of Thermal Watt-Demand Meter, Theoretical Possibilities in an Internally Heated. Lynch....764–70; disc. 986

Board of Directors, Report of the....1136–49

Brakes for High-Speed Trains With Particular Reference to Their Electrical Features, Electropneumatic. McCune....137–42

Branch Circuits on Power Supplies of 600 Volts and Less, Thermal Co-ordination of Motors, Control, and Their. Jones....483–7; disc. 975

Breaker, A Fast Circuit. Bohn, Jensen..165–8; disc. 405

Breaker, A 2,500,000-Kva Compressed-Air Powerhouse. Ludwig, Wilcox, Baker..235–41; disc. 414

Breaker, Field Tests and Performance of a High-Speed 138-Kv Air-Blast Circuit. Sporn, Strang....1–6; disc. 412

Breaker for Mercury-Arc-Rectifier Anode Circuits and Its Relation to the Arc-Back Problem, A New Multiple High-Speed Air Circuit. Seaman, Morton....788–96; disc. 1057

Breaker Installations in Canada, Some Air-Blast Circuit-. Haberl, Moore....859–63; disc. 1073

Breaker Performance, Transient Recovery Voltages and Circuit-. Van Sickle....804–13; disc. 1014

Breaker Performance When Switching Large Capacitor Banks, Tests and Analysis of Circuit-. Schroeder, Boehne, Butler....821–31; disc. 1020

Breaker Testing Station, High-Capacity Circuit-. MacNeill, Batten....49–53; disc. 406

Breakers, A Compressed-Air Operating Mechanism for Oil Circuit. Cunningham, Hill..695–8; disc. 1019

Breakers, Design and Operation of High-Voltage Axial Air-Blast Circuit. Leuthold....869–75; disc. 1073

Breakers, Field Tests on High-Capacity Air-Blast Station-Type Circuit. Strang, Skeats....100–04; disc. 409

Breakers, Field Tests on High-Capacity Station Circuit-. Braley....31–6; disc. 408

Breakers for High-Speed Single-Pole Tripping and Reclosing, Relays and. Goldsborough, Hill....77–81; disc. 429

Breakers to Transmission Systems, Analysis of the Application of High-Speed Reclosing. Crary, Kennedy, Woodrow....339–48; disc. 423

Brush-Shifting A-C Motor, Theory of the. Conrad, Zweig, Clarke.
Part III....502–06
Part IV....507–13

Burying Telephone Cables, Recent Developments in. Fisher, Smith....169–74

Bus Characteristics, Three-Winding Transformer Ring-. Bills, MacArthur....848–9; disc. 1066

Bus Protection, Linear Couplers for. Harder, Klemmer, Sonnemann, Wentz....241–8; disc. 463

Bus Supports for Rectangular Tubular Conductors, Formulas for Calculating Short-Circuit Stresses for. Higgins....578–80

C

Cable—II, Load Ratings of. Halperin....930–42; disc. 1040

Cable, Low-, Medium-, and High-Pressure Gas-Filled. Shanklin....719–26; disc. 1021

Cable, 120-Kv Compression-Type. Faucett, Komives, Collins, Atkinson....652–7; disc. 1021

Cable, 120-Kv High-Pressure Gas-Filled. Faucett, Komives, Collins, Atkinson....658–65; disc. 1021

Cables in Canada, Design, Manufacture, and Installation of 120-Kv Oil-Filled. Farnham, Titus....881–9; disc. 1074

Cables, Recent Developments in Burying Telephone. Fisher, Smith....169–74

Calculation of Circuit Transient Recovery Voltages. Practical. Adams, Skeats, Van Sickle, Sillers....771–9; disc. 1017

Calculation of Fault Currents, Simplified. (Committee Report)....1133–35

Pages 349–482 comprise the June 1942 "Supplement to Electrical Engineering—Transactions Section"; pages 893–1076 the December 1942 Supplement; pages beyond 1076 appear only in the 1942 Transactions volume.

Calculations, High-Frequency Coaxial-Line. Race, Larrick 526–30
Calorimetric Method for Determining Efficiencies of Electric Machines. Siegfried, Thulin 530–2
Canada, Design, Manufacture, and Installation of 120-Kv Oil-Filled Cables in. Farnham, Titus ..... 881–9; disc. 1074
Canada, Some Air-Blast Circuit-Breaker Installations in. Haberl, Moore ..... 859–63; disc. 1073
Capacitor Banks, Tests and Analysis of Circuit-Breaker Performance When Switching Large. Schroeder, Boehne, Butler ..... 821–31; disc. 1020
Capacitor Motor, Current Loci for the. McFarland 152–6
Capacitors for Transmission Circuits, Series. Starr, Evans ..... 963–73; disc. 1044
Car Operating Results in Pittsburgh, PCC. Clardy ..... 214–17; disc. 400
Carbon Arc—a Valuable Industrial Tool, The. Kalb 581–5
Carrier-Current Facilities for a Power Line, Multichannel. Sandstrom, Foster ..... 71–6; disc. 469
Carrier Telegraph System, Frequency-Modulated. Bramhall, Boughtwood 36–9
Cars, A Control-System for Modern Multiple-Unit Rapid-Transit. Moore 142–7
Cascade Variable-Speed Drive, A Study of the Modified Kramer or Asynchronous-Synchronous. Liwachitz, Kilgore 255–60
Cathode-Ray Oscillograph for Testing Lightning Arresters, Modern. Wade, Carpenter, MacCarthy ..... 549–53; disc. 982
Cellulose Insulation, Factors Affecting the Mechanica Deterioration of. Clark ..... 742–9; disc. 991
Characteristics, Distribution-Type Lightning-Arrester Performance. (Committee Report) 132
Characteristics of Current Transformers During Faults, Transient. Concordia, Weygandt, Shott ..... 280–6; disc. 469
Characteristics of Driven Grounds—II, Impulse and 60-Cycle. Bellaschi, Armington, Snowden ..... 349–63; disc. 446
Characteristics of Electric-Power Systems, Transient Recovery-Voltage. St. Clair, Adams ..... 666–9; disc. 1016
Characteristics of Lightning Currents Discharged by Arresters, Field Investigation of the. Gross, McCann, Beck ..... 266–71; disc. 461
Characteristics, Three-Winding Transformer Ring-Bus. Bills, MacArthur ..... 848–9; disc. 1066
Chicago Subway, Electric Facilities and Operating Plan for the First. DeLeuw ..... 780–7; disc. 980
Circuit Analysis, Rectifier Terminology and. Willis, Hershkind ..... 496–9; disc. 974
Circuit Breaker, A Fast. Bohn, Jensen ..... 165–8; disc. 405
Circuit Breaker, Field Tests and Performance of a High-Speed 138-Kv Air-Blast. Sporn, Strang ..... 1–6; disc. 412
Circuit Breaker for Mercury-Arc-Rectifier Anode Circuits and Its Relation to the Arc-Back Problem, A New Multiple High-Speed Air. Seaman, Morton ..... 788–96; disc. 1057
Circuit-Breaker Installations in Canada, Some Air-Blast. Haberl, Moore ..... 859–63; disc. 1073
Circuit-Breaker Performance, Transient Recovery Voltages and. Van Sickle ..... 804–13; disc. 1014
Circuit-Breaker Performance When Switching Large Capacitor Banks, Tests and Analysis of. Schroeder, Boehne, Butler ..... 821–31; disc. 1020
Circuit-Breaker Testing Station, High-Capacity. MacNeill, Batten ..... 49–53; disc. 406
Circuit Breakers, A Compressed-Air Operating Mechanism for Oil. Cunningham, Hill ..... 695–8; disc. 1019
Circuit Breakers, Design and Operation of High-Voltage Axial Air-Blast. Leuthold ..... 869–75; disc. 1073
Circuit Breakers, Field Tests on High-Capacity Air-Blast Station-Type. Strang, Skeats ..... 100–04; disc. 409
Circuit Breakers, Field Tests on High-Capacity Station. Braley ..... 31–6; disc. 408
Circuit-Interrupting Devices—1928–1940, Bibliography on. (Committee Report) 1077–1100
Circuit, The Effect of Initial Conditions on Subharmonic Currents in a Nonlinear Series. Angello 625–7
Circuit Transient Recovery Voltages, Practical Calculation of. Adams, Skeats, Van Sickle, Sillers ..... 771–9; disc. 1017
Circuits and Misfire Indication Circuits, Ignitor Excitation. Mittag, Schmidt ..... 575–7; disc. 1061
Circuits During Faults to Ground, Performance of Ground-Relayed Distribution. Gilkeson, Jeanne, Davenport ..... 40–8; disc. 424
Circuits for the Hunting of Electrical Machinery, Equivalent. Kron ..... 290–6; disc. 456
Circuits on Power Supplies of 600 Volts and Less, Thermal Co-ordination of Motors, Control, and Their Branch. Jones ..... 483–7; disc. 975
Circuits, Protection of Pilot-Wire. Harder, Boatwick ..... 645–52; disc. 996
Circuits, Relative Expense for Service Restoration With Different Types of Overcurrent Protection for Distribution. Lincks, Craig ..... 813–21; disc. 980
Circuits, Relative Value of Different Types of Overcurrent Protection for Distribution. Lincks ..... 19–26; disc. 426
Circuits, Series Capacitors for Transmission. Starr, Evans ..... 963–73; disc. 1044
Coastal-Line Calculations, High-Frequency. Race, Larrick 526–30
Coil Control for A-C Locomotives With Particular Reference to Resistor Transition, Improvements in Preventive-. Hatch, Ogden 727–32
Coil, Formulas for the Magnetic-Field Strength Near a Cylindrical. Dwight ..... 327–33; disc. 445
Colleges of Engineering, Evening Courses at Graduate Levels—a Challenge to. Beach ..... 88–94; disc. 430
Colorado, Lightning Investigation at High Altitudes in. Robertson, Lewis, Foust ..... 201–08; disc. 453
Combination of Probability Curves in Engineering, The. Wilkinson 953–63
(Committee Report) Bibliography on Automatic Stations—1930–1941 1111–32
(Committee Report) Bibliography on Circuit-Interrupting Devices, 1928–1940 1077–1100
(Committee Report) Bibliography on Electrical Safety—1930–1941 1101–10
(Committee Report) Current- and Potential-Transformer Standardization ..... 698–706; disc. 998
(Committee Report) Distribution-Type Lightning Arrester Performance Characteristics 132
(Committee Report) Interim Report on Guides for Overloading Transformers and Voltage Regulators ..... 692–4; disc. 1063
(Committee Report) Simplified Calculation of Fault Currents 1133–35
Committees and Officers for 1942–43 1150–54
(Communication) A New Instrument for Recording Transient Phenomena. Begun ..... 175–7; disc. 418
(Communication) Combination of Probability Curves in Engineering, The. Wilkinson 953–63
(Communication) Frequency-Modulated Carrier Telegraph System. Bramhall, Boughtwood 36–9
(Communication) Poles and Pole Treatment. Colley 685–91
(Communication) Recent Developments in Burying Telephone Cables. Fisher, Smith 169–74
Compensator, A New Voltage-Regulating Relay Plus Line-Drop. Carlin ..... 53–6; disc. 481
Complex Quantities, Inverse Functions of. Dwight 850–3
Compressed-Air Operating Mechanism for Oil Circuit Breakers, A. Cunningham, Hill ..... 695–8; disc. 1019
Compressed-Air Powerhouse Breaker, A 2,500,000-Kva. Ludwig, Wilcox, Baker ..... 235–41; disc. 414
Compression-Type Cable, 120-Kv. Faucett, Komives, Collins, Atkinson ..... 652–7; disc. 1021
Concentric Tubular Conductors, Reactance and Skin Effect of. Dwight ..... 513–18; disc. 976
Conditions, Application of Apparatus and Conductors Under Various Ambient-Temperature. Hellmund, McAuley ..... 553–8; disc. 992
Conditions on Subharmonic Currents in a Nonlinear Series Circuit, The Effect of Initial. Angello 625–7
Conductor Sag on Transmission-Line Shielding, The Influence of Towers and. Sorensen, McMaster ..... 948–55; disc. 448
Conductors, Formulas for Calculating Short-Circuit Stresses for Bus Supports for Rectangular Tubular. Higgins 578–80
Conductors, Reactance and Skin Effect of Concentric Tubular. Dwight ..... 513–18; disc. 976
Conductors Under Various Ambient-Temperature Conditions, Application of Apparatus and. Hellmund, McAuley ..... 553–8; disc. 992
Consumers Power Company 140-Kv System, Study of Driven Rods and Counterpoise Wires in High-Resistance Soil on. Hemstreet, Lewis, Foust ..... 628–34; disc. 1000
Control, and Their Branch Circuits on Power Supplies of 600 Volts and Less, Thermal Co-ordination of Motors. Jones ..... 483–7; disc. 975
Control for A-C Locomotives With Particular Reference to Resistor Transition, Improvements in Preventive-Coil. Hatch, Ogden 727–32
Control for Steam Boilers on Diesel-Electric and Straight Electric Locomotives, Electric. Burgess ..... 604–06; disc. 980
Control for World's Largest Induction Motor, Precision Speed. Longwell, Reagan ..... 634–8; disc. 1050
Control of Load Swings, Frequency. McCormack, Lombard ..... 623–4; disc. 1043
Control of Prime-Mover Speed Governors, Supplementary. Crary, McClure ..... 209–14; disc. 395
Control of Tie-Line Power Swings. Concordia, Shott, Weygandt ..... 306–14; disc. 395
Control System for Modern Multiple-Unit Rapid-Transit Cars. Moore 142–7
Cooled Oil-Insulated Transformers, Hot-Spot Winding Temperatures in Self-. Vogel, Narbutovskih ..... 133–6; disc. 418
Co-ordination of Motors, Control, and Their Branch Circuits on Power Supplies of 600 Volts and Less, Thermal. Jones ..... 483–7; disc. 975
Correction for Saturation. McFarland 233–5
Counterpoise for Transmission-Line Lightning Protection, Practical Design of. Hanson, Waldorf ..... 599–603; disc. 1010
Counterpoise Wires in High-Resistance Soil on Consumers Power Company 140-Kv System, Study of Driven Rods and. Hemstreet, Lewis, Foust ..... 628–34; disc. 1000
Couplers for Bus Protection, Linear. Harder, Klemmer, Sonnemann, Wentz ..... 241–8; disc. 463
Courses at Graduate Levels—a Challenge to Colleges of Engineering, Evening. Beach ..... 88–94; disc. 430
Current- and Potential-Transformer Standardization. (Committee Report) ..... 698–706; disc. 998
Current Facilities for a Power Line, Multichannel Carrier. Sandstrom, Foster ..... 71–6; disc. 469
Current Loci for the Capacitor Motor. McFarland 152–6
Current Ratings of Electronic Devices for Intermittent Service. Hellmund 569–73
Current-Transformer Performance Based on Admittance-Vector Locus. Schwager ..... 26–30; disc. 465
Current Transformers During Faults, Transient Characteristics of. Concordia, Weygandt, Shott ..... 280–6; disc. 469
Currents Discharged by Arresters, Field Investigation of the Characteristics of Lightning. Gross, McCann, Beck ..... 266–71; disc. 461
Currents in a Nonlinear Series Circuit, The Effect of Initial Conditions on Subharmonic. Angello 625–7
Currents in a Rotating Disk, On Eddy. Smythe 681–4
Currents in Distribution Transformers Due to Lightning, Abnormal. Bryant, Newman ..... 564–8; disc. 1003
Currents, Simplified Calculation of Fault. (Committee Report) 1133–35
Curves in Engineering, The Combination of Probability. Wilkinson 953–63
Curves, Synthetic or Equivalent Load. Hamilton 369–81
Cutout, Aircraft Voltage Regulator and. Jones, Exner, Wright 334–9
Cylindrical Coil, Formulas for the Magnetic-Field Strength Near a. Dwight ..... 327–33; disc. 445

D

Demand, Measurement of Maximum. Lincoln ..... 57–62; disc. 472
Design and Operation of High-Voltage Axial Air-Blast Circuit Breakers. Leuthold ..... 869–75; disc. 1073
Design and Operation of the Plantation Pipe Line, Electrical Features of. Hyde, Britton ..... 638–44; disc. 1051
Design, Manufacture, and Installation of 120-Kv Oil-Filled Cables in Canada. Farnham, Titus ..... 881–9; disc. 1074
Design of Counterpoise for Transmission-Line Lightning Protection, Practical. Hanson, Waldorf ..... 599–603; disc. 1010
Design of Electrical Equipment for Large Diesel-Electric Locomotives, Progress in. Smith ..... 130–1; disc. 404
Design of Long-Scale Indicating Instruments. Parsons, Rowell, Hoare ..... 118–27; disc. 476
Detecting Relay, A New Single-Phase-to-Ground Fault-. Sonnemann ..... 677–80; disc. 995
Deterioration of Cellulose Insulation, Factors Affecting the Mechanical. Clark ..... 742–9; disc. 991
Determination and Standardization, History of A-C Wave Form, Its. Bedell ..... 864–8; disc. 1071
Development of Trolley-Coach Overhead Reflected in Higher Service Standards, Progress in. Birch 185–91
Developments in Burying Telephone Cables, Recent. Fisher, Smith 169–74
Devices for Intermittent Service, Current Ratings of Electronic. Hellmund 569–73
Dielectric Heating in Industry, Application of Vacuum-Tube Oscillators to Inductive and. Jordan 831–4
Dielectric Strength and Life of Impregnated-Paper Insulation, The. Part III. Whitehead ..... 618–22; disc. 1049
Diesel-Electric and Straight Electric Locomotives, Electric Control for Steam Boilers on. Burgess ..... 604–06; disc. 980
Diesel-Electric Locomotives, Modern Electrical Equipment for Industrial. Greer ..... 229–32; disc. 400
Diesel-Electric Locomotives, Progress in Design of Electrical Equipment for Large. Smith ..... 130–1; disc. 404
Differential Protection, A Practical Discussion of Problems in Transformer. Shill ..... 854–8; disc. 1067
Direct Current, A New Moving-Magnet Instrument for. Faus, Mackintyre ..... 586–8; disc. 987
D-C Telemeter or D-C Selsyn for Aircraft, An. Jewell, Faus 314–17
D-C Testing of Generators in the Field, Progress Report of. Davis, Leftwich ..... 14–18; disc. 470
Directional Relays, Factors Which Influence the Behavior of. Graybeal 942–52
Discussion of Problems in Transformer Differential Protection, A Practical. Shill ..... 854–8; disc. 1067

(Distribution) A Practical Discussion of Problems in Transformer Differential Protection. Shill....854–8; disc. 1067
Distribution Circuits During Faults to Ground, Performance of Ground-Relayed. Gilkeson, Jeanne, Davenport....40–8; disc. 424
Distribution Circuits, Relative Expense for Service Restoration With Different Types of Overcurrent Protection for. Lincks, Craig....813–21; disc. 980
Distribution Circuits, Relative Value of Different Types of Overcurrent Protection for. Lincks....19–26; disc. 426

Theoretical Possibilities in an Internally Heated Bimetal Type of Thermal Watt-Demand Meter. Lynch....764–70; disc. 986
Theory of the Amplidyne Generator, Steady-State. Graybeal....750–6; disc. 1049
Theory of the Brush-Shifting A-C Motor. Conrad, Zweig, Clarke.
Part III....502–06
Part IV....507–13
Thermal Co-ordination of Motors, Control, and Their Branch Circuits on Power Supplies of 600 Volts or Less. Jones....483–7; disc. 975
Thermal Watt-Demand Meter, Theoretical Possibilities in an Internally Heated Bimetal Type of. Lynch....764–70; disc. 986
Thin Metal Surfaces, Effect of Lightning on. McEachron, Hagenguth....559–64; disc. 1013
Three-Winding Transformer Ring-Bus Characteristics. Bills, MacArthur....848–9; disc. 1066
Tie-Line Power Swings, Control of. Concordia, Shott, Weygandt....306–14; disc. 395
Tonnage Rating, Single-Phase A-C Electric Locomotives on the Pennsylvania Railroad—Protection and. Griffith....224–8
Tool, The Carbon Arc—a Valuable Industrial. Kalb....581–5
Torque Measurement, The Acceleration-Oscillogram Method of Motor-. Atkinson, Downie....7–9; disc. 473
Towers and Conductor Sag on Transmission-Line Shielding, The Influence of. Sorensen, McMaster....159–65; disc. 448
Train Ride, Acoustics and the Quiet. Jack....325–32; disc. 417
Trains With Particular Reference to Their Electrical Features, Electropneumatic Brakes for High-Speed. McCune....137–42
Transformer Banks, High-Voltage Fusing of. Marsh, Dodds....533–5; disc. 977
Transformer Differential Protection, A Practical Discussion of Problems in. Shill....854–8; disc. 1067
Transformer Performance Based on Admittance-Vector Locus, Current-. Schwager....26–30; disc. 465
Transformer Ring-Bus Characteristics, Three-Winding. Bills, MacArthur....848–9; disc. 1066
Transformer Standardization, Current- and Potential-. (Committee Report)....698–706; disc. 998
Transformers and Voltage Regulators, Interim Report on Guides for Overloading. (Committee Report)....692–4; disc. 1063
Transformers by Hot-Spot Temperatures, Emergency Overloading of Air-Cooled Oil-Immersed Power. Montsinger, Ketchum....906–16; disc. 993
Transformers Due to Lightning, Abnormal Currents in Distribution. Bryant, Norman....847–8; disc. 1003
Transformers During Faults, Transient Characteristics of Current. Concordia, Weygandt, Shott....280–6; disc. 469
Transformers, Emergency Overloads for Oil-Insulated. Vogel, Sloat....669–73; disc. 988
Transformers, Hot-Spot Winding Temperatures in Self-Cooled Oil-Insulated. Vogel, Narbutovskih....133–6; disc. 418
Transient Characteristics of Current Transformers During Faults. Concordia, Weygandt, Shott....280–5; disc. 469
Transient Conditions in the Pole Axis, Saturated Synchronous Machines Under. Rüdenberg....297–306; disc. 444
Transient Phenomena, A New Instrument for Recording. Begun....175–7; disc. 418
Transient Recovery-Voltage Characteristics of Electric Power Systems. St. Clair, Adams....666–9; disc. 1016
Transient Recovery Voltages and Circuit-Breaker Performance. Van Sickle....804–13; disc. 1014
Transient Recovery Voltages, Practical Calculation of Circuit. Adams, Skeats, Van Sickle, Silfers....771–9; disc. 1017
Transients, Resistance-Welding. Kimberly....94–5
(Transmission) A Practical Discussion of Problems in Transformer Differential Protection. Shill....854–8; disc. 1067
Transmission Circuits, Series Capacitors for. Starr, Evans....963–73; disc. 1044
(Transmission) Design and Operation of High-Voltage Axial Air-Blast Circuit Breakers. Leuthold....869–75; disc. 1073
(Transmission) Effect of Lightning on Thin Metal Surfaces. McEachron, Hagenguth. 559–64; disc. 1013
(Transmission) Facilities for the Supply of Kilowatts and Kilovars. Sels, Seely....249–55; disc. 402

(Transmission) Field Investigation of the Characteristics of Lightning Currents Discharged by Arresters. Gross, McCann, Beck.....266–71; disc. 461
(Transmission) Field Tests on High-Capacity Air-Blast Station-Type Circuit Breakers. Strang, Skeats.....100–04; disc. 409
(Transmission) Field Tests on High-Capacity Station Circuit Breakers. Braley.....31–5; disc. 408
(Transmission) High-Speed Single-Pole Reclosing. Trainor, Hobson, Muller.....81–7; disc. 422
(Transmission) High-Voltage Fusing of Transformer Banks. Marsh, Dodds.....533–5; disc. 977
(Transmission) Impulse and 60-Cycle Characteristics of Driven Grounds—II. Bellaschi, Armington, Snowden.....349–63; disc. 446
